Mission Critical Portfolio

Today’s Government and Public Safety Challenges
Timely and dependable communications … faster access to information … these are essential for government and public safety agencies to detect and prevent incidents, and provide protection within the community.

During an emergency, there’s no time for public safety personnel to be hampered by technology. Delivering real-time information across multiple agencies eliminates communication barriers and provides seamless connectivity—ultimately shortening response times and saving lives.

With rapid advances in technology, more capability and the ever-pressing issues of security, interoperability and proven reliability, the challenge to keep your public safety officers trained, informed and out of harm’s way is now greater than ever.
“Our personnel, their psyche and their training says ‘I’ve got to do it now’ and they expect the same of their equipment.”

— Tyrone C. Scott, Executive Fire Commissioner, City of Detroit
Motorola thoroughly understands the communication needs of government and provides a migratable platform to meet today’s needs for interoperable communications—while looking to the future and designing in the needs of tomorrow.

The MOTOA4 portfolio represents four advanced evolutions of mission critical communications. From analog voice to broadband networking, the MOTOA4 portfolio includes easy to use mobile devices, networks, applications and services that are fully optimized for the demands of public safety agencies.

+ Project 25 interoperable networks allow public safety personnel to communicate across multiple jurisdictions and agencies.
+ Broadband networks with streaming video for improved in-field decision making.
+ Mobile AFIS fingerprinting and biometrics capabilities to check the status of suspects in real time.
+ Wireless-enabled, fully ruggedized computers and in-vehicle workstations built to surpass military standards.
+ GPS-based location applications for tracking people and assets.
+ Dispatch and mobile applications collect and distribute critical information to enable rapid decision making and informed response.
“Motorola not only understands the needs of public safety, I think they’re ahead of us. They are creating solutions to the issues that we don’t even know can be solved yet.”

— Joe Pitcher, Executive Assistant County Attorney, Johnson County, Indiana
Reducing Crime With Mobile Video

To combat crime in Jordan Downs, one of Los Angeles’ most dangerous neighborhoods, the Los Angeles Police Department is using mobile video surveillance over a wireless broadband network.

Improves the Safety of Officers
Responding to a call armed with critical information provides an additional safety net. With real-time video, officers know what they will be facing once they arrive on the scene.

Augments Existing Staff
Video enhances the power of the police force without adding headcount.

Deters Crime
People tend to act differently when they know they are on camera.

Enhances Trust and Police Transparency
Video adds trust and transparency, helping to build bridges between the community and the police department.

Provides Community Access to Information
Wireless broadband technology can support not only public safety, but homes, schools, hospitals and business districts, too.

“Mobile applications of camera technology are the future of policing.” — Charlie Beck, Deputy Chief, Los Angeles Police Department

Evolution of Advanced Mission Critical Communications
MOTOA4 enables public safety agencies to confidently take the next step in mission critical communications, beyond the basics, to the most reliable and innovative wireless solutions that help save lives and protect communities.

The Motorola MOTOA4 Mission Critical Portfolio
MOTOA4 solutions are built around a fundamental need for technology that’s second nature, enabling responders to focus on the mission and not the technology. Motorola’s extensive portfolio includes wireless networks, easy to use devices and advanced applications that allow agency personnel to receive better information so they can make better decisions for better outcomes.
Count On Our Experience
In today’s world, you need a partner who understands what mission critical is all about: the lives and well-being of your employees and the citizens they protect. For more than 70 years, Motorola has supported the communications needs of public safety and we’ll be standing by our customers for many years to come.

Visit www.motorola.com/MOTOA4 today and experience technology that’s second nature.

“You want to make sure the company who is here today is going to be here tomorrow. I don’t want to worry about this company going away. I don’t have to worry whether they’re going to stand behind their product. I feel very confident.”

— Chief of Police Richard Bull, Ripon Police Department, California
